EXPERIENCE

Software Developer | May 2023 - Present

Exaze IT Solution, Hyderabad

- Involved in the Design and Development of backend & Frontend changes for Notification modules in the travel portal project.
- Implemented the Notification API and its corresponding frontend.
- Additionally, I was involved in developing the Travel Portal Home/Dashboard page.
- Broke project requirements into functionalities and plan to achieve the milestone in a short span of time(Sprint).
- Built a reusable and maintainable codebase using React hooks and Spring boot best practices, reducing code duplication.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.

Frontend Developer| Feb 2022 - March 2023

Sebone Technologies, Bengaluru

- Involved in Design Sessions and Development of changes for Product Management modules
- Developed Frontend solutions for various features in Product and Category like Product creation for leather categories like belt and wallet, dashboard view of existing products, updates and controlling access for product specifications for various stakeholders.
- Decomposed project requirements into discrete functionalities and devised a strategic plan to attain milestones efficiently within short sprint cycles.
- End-2-end ownership of front end for Product Management modules.

“

Hardworking and result oriented developer. Strong interest in front end technologies. Always looking for improvements and seeking challenging problems to solve. I would like to explore how thing will work in Industry to generate value, explore the various business domain and translate business requirement to tech requirement.

”
